## PROJECTS

---

### CRM Dashboard

CRM dashboard for managing clients, projects, and tasks built with Laravel and coreUI layout.

- Users can create an account and log in to the app.
- Implemented notifications system via email.
- implemented authorization for admins to manage and assign tasks and projects.

---

### Authentication and Dashboard System

Developed a Laravel API and dashboard that allows users to register, login, and reset their passwords. The API uses email verification to confirm user accounts. The dashboard allows admins to manage users and products, including creating, editing, deleting, and listing them. Products can also be assigned to users.

- Developed a Laravel API that allows users to register, login, and reset their passwords.
- Created a dashboard that allows admins to manage users and products.
- Used email verification to confirm user accounts.

---

### Game Management System

Developed gaming website using Laravel and RAWG API integration.

- Allows users to search for games by name.
- Allows users to view the details of a game, including its name, genre, category, price, and rating.

---

### Task Schedule

Completed task schedule assessment administered by Coalition Technologies for Laravel developer role at Coalition Technologies.

- Users can enter the task name and its priority and related project.
- It has drag-and-drop functionality the user can enter projects and the associated tasks into it.
- It has a select dropdown to view the project and its tasks.

---

### Invoice Extractor (Incomplete)

Invoice extractor and converter

- Developed a prototype invoice extractor web application using Laravel.
- Created a controller to execute shell commands to run a Python library and extract invoice tables.
- Converted the extracted data to JSON and displayed it on a view.
